

Eco-Gold

Biodegradable Degreaser

New Organic Formulation

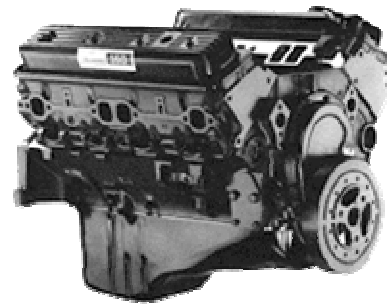

Sierra's 'Eco-Gold Organic Degreaser' was originally developed as a true alternative to the flammable Solvent Degreasers for the mining industry. Fast acting, and capable of penetrating caked on grease and oil. This same successful formulation is now available for general workshop use.

Eco-Gold Organic Degreaser is Biodegradable and unlike any other degreaser in that it's organic & viscous nature allows it to cling longer to the surface to which it is applied. This gives greater adhesion, and greater cleaning power.

Upon contact with grease & oil, Eco-Gold Organic Degreaser converts the greases to soap (saponification), and emulsifies it, allowing it to be simply washed away from the surface.

Characteristics

- ✓ **Non Flammable** – non regulated for transportation and storage
- ✓ **Non Combustible**
- ✓ **Fast Acting** – Penetrates and cleans quickly
- ✓ **Biodegradable and Organic**
- ✓ **Viscous** – “clings” to the surface longer.
- ✓ **Dilutable** – dilute with water if required

Engines, parts & equipment, concrete, for grease removal. Use neat.

APPLICATION

Use in place of Solvent Degreasers, applied by brush or spray (air, trigger), and allowed to penetrate for between 3 to 10 minutes depending upon the situation. For very dirty situations, it is often helpful to work in with a brush after applying. Wash away with water. Eco-Gold Organic Degreaser is ideal for use through pressure cleaners.

Eco-Gold Organic Degreaser may be diluted for a multitude of other uses, from minor degreasing of oil film (2:1) to general surface cleaning (20:1). However for normal degreasing of grease, use in the same way as solvent degreasers or kerosene – full strength.

For full details on safety, please request a MSDS sheet, or download from our website at www.sierrachem.com.au

CHARACTERISTICS

Appearance	Transparent Brownish Colour
Specific Gravity	1.13
Flashpoint	n/a
Characteristics	viscous
Use	Degreaser – Heavy Duty

Uses

Mining – Cleaning of heavy equipment using Pressure cleaners.
Automotive – Engine degreasing
Industrial – floors, concrete, equipment
Contract Cleaning – shopping centres, schools
Surfaces – Steel, concrete, brick, asphalt, glass
